Manage Agents	5
Step 7. Add credentials to wazuh agent.....	6

```
16/03/2025 00:01:13 INFO: You can access the web interface at  
://<wazuh-dashboard-ip>:443  
User: admin  
Password: Oq.N4h*2XU9rIoIZBq9z8sY27gG*z8Oi  
16/03/2025 00:01:13 INFO: Installation finished.
```

Make sure internet connectivity is correct!

Go to vm settings and select bridge choosing your network adapter.

By default, its set to a virtual adapter and this is wrong.

Wazuh Command line Installation Steps

Step 1. Install & upgrade base packages

Step 1: Update System Packages

Before installing Wazuh, update the system package lists to ensure that the latest versions of packages and dependencies are fetched.

```
sudo apt upgrade
```

```
sudo apt update
```

Step 2. Install Curl

```
sudo apt install curl -y
```

Step 3 Install Index

Quickstart

Installation guide

Wazuh indexer

Assisted installation

Step-by-step installation

Wazuh server

Wazuh dashboard

Wazuh agent

communications between the Wazuh central components.

```
# curl -sO https://packages.wazuh.com/4.9/wazuh-certs-tool.sh
# curl -sO https://packages.wazuh.com/4.9/config.yml
```

2. Edit `./config.yml` and replace the node names and IP values with the corresponding names and IP addresses. You need to do this for all Wazuh server, Wazuh indexer, and Wazuh dashboard nodes. Add as many node fields as needed.

Indexer

1. Cer

Ger

cer

2. No

Inst

dep

Adc

rep

Inst

inde

Cer

Step 4 edit config.yml file

Sudo nano config.yml

```

nodes:
  # Wazuh indexer nodes
  indexer:
    - name: node-1
      ip: "192.168.1.167"
    #- name: node-2
    # ip: "<indexer-node-ip>"
    #- name: node-3
    # ip: "<indexer-node-ip>"

  # Wazuh server nodes
  # If there is more than one Wazuh server
  # node, each one must have a node_type
  server:
    - name: wazuh-1
      ip: "<wazuh-manager-ip>"
      # node_type: master
    #- name: wazuh-2
    # ip: "<wazuh-manager-ip>"

```

Step 5 Generate Config Files

```

ntui:~$
ntui:~$
ntui:~$
ntui:~$ bash wazuh-install.sh --generate-config-files
wazuh-install.sh: line 2390: /var/log/wazuh-install.log: Permission denied
wazuh-install.sh: line 2390: /var/log/wazuh-install.log: Permission denied

```

Turn off firewall and then run the command

```
curl -sO https://packages.wazuh.com/4.9/wazuh-install.sh && sudo bash ./wazuh-install.sh --ignore-check -a
```

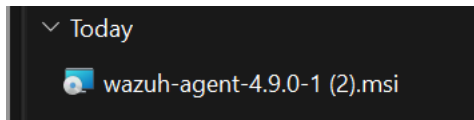

If there is still a problem with script run this command

```
sudo bash ./wazuh-install.sh --ignore-check --overwrite -a
```

Step 6 login to Wazuh dashboard

Put the ip address of your machine that installed wazuh on it.

Step 7 Install agent installer on computer used

Step 8 Add Ip wait for manager to sync hit refresh

Step 9 Additional troubleshooting

```

User: admin
Password: E
```

Manage Agents

/var/ossec/bin/manage_agents

```
/var/ossec/bin/manage_agents
```

Select the option to add a new agent (`A`):

- Provide a name for the agent.
- Enter the agent's IP address.
- Confirm the addition by pressing `Y`.

3. Extract Agent Key:

After adding an agent, extract its key by selecting the `E` option:

Step 7. Add credentials to wazuh agent
